Abstract (en)  
[origin: EP0608534A1] The invention relates to a wet press for a papermaking machine for drying a wet paper web by pressing; - having a plurality of press rolls (9-13); - the press rolls form, respectively in pairs, a press nip with each other; - the paper web (4) is supported continuously by an envelope surface of a press roll on its path from the first to the last press nip of the press; The invention is characterised by the following features:  
- at least four successive press nips are provided; - the press rolls (10, 11), which together form a felt-less second press nip (II), each have a closed envelope surface. <IMAGE>
