Abstract (en)  
[origin: EP0608553A1] A burial chamber having a wall (1) which is rectangular in outline and comprises prefabricated parts, onto which a cover (2) can be positioned, is designed such that the wall (1), comprising side walls (4) and end walls (5), can be produced at the location of use from a kit made up of flexurally rigid elements (6,7) of relatively low weight, the elements (6,7) and the cover (2) consist of a material which is corrosion-resistant even in the soil, can be subjected to high loading in the direction of its thickness and is of relatively low weight per unit area, such as stainless-steel sheet metal. <IMAGE>
