Abstract (en)
[origin: EP0608947A2] It is well known to replenish photographic processing apparatus and to treat used solutions so that unwanted material is removed therefrom which may be deleterious to final product. Described herein is a unit which contains both replenisher chemistry and clean-up chemistry. The unit (10) comprises a plurality of compartments (20, 22, 24, 26, 30, 34) each of which contains either replenisher chemistry or clean-up chemistry. Each compartment (20, 22, 24, 26, 30, 34) is connectable to the appropriate stage of the processing apparatus. <IMAGE>
