Abstract (en)

[origin: GB2229585A] A coupling for an electric distribution track includes a track (1) with a channel having an inner wall carrying a conductor (10) and side walls (6, 7) with inturned flanges (8, 9), an elongate connector rod (2) with a screw threaded end through which a contact (16) projects and a nut (18) which engages behind the flanges and presses the end of the connector and the contact against the track conductor. <IMAGE>
