Abstract (en)
[origin: EP0609954A1] Child-proof container assembly (1) consisting of a container (2) provided with a sliding lid (5). Projecting means (6,7) are present to prevent the lid being removed from the container. Said projecting means are fitted in such a manner that they are inoperative in only one specific position of the lid relative to the container, so that the lid can be taken off the container. Preferably, the lid consists of two parts, a sliding peripheral edge (13) and a stationary sealing part (14) sealing the opening of the container, which sealing part is accommodated in the peripheral edge and is resiliently displaceable. <IMAGE>
