Abstract (en)
[origin: WO9309309A1] The invention relates to a roof ridge sealing strip (1) with a central bonded fabrics region (8) permitting air to pass through and two edge regions (8) which can be adapted to the wave shape of the roofing plates (6) and have an elastic stabilisation insert (S); to obtain a particularly easy to lay strip it is proposed that the stabilisation insert (S) take the form of sinusoidal wires (13) or strips (11) running parallel to the edge (10').
