Abstract (en)

[origin: WO9309013A1] Described is a device for attaching an overhead-ropeway cabin (5), chair or similar object to its suspension bar (1), the lower end of the suspension bar being fitted with a suspension device (2) to which the cabin (5), chair, etc., is attached. The suspension device (2) on the suspension bar (1) extends underneath a suspension frame (3) for the cabin (5), chair, etc., and damping elements (4) are fitted between the suspension device (2) and the suspension frame (3)
