Abstract (en)

[origin: WO9405411A1] The invention concerns a device for dissolving CO<sub>2</sub> gas in water to produce carbonized water in a storage tank fitted with refrigeration pipes forming part of a refrigeration circuit designed to cool the contents and to form a shroud of ice in the region of the tank walls. The invention calls for means to be fitted in the vicinity of the walls cooled by the refrigeration pipes of the refrigeration circuit to ensure local ice formation in some areas and not in others.
