Abstract (en)
[origin: EP0611258A1] The pad printing machine has a carriage (45) which can be moved back and forth on a base plate (1) by means of a drive (25). The carriage (45) has a U-shaped support (8) which is constructed in a box shape and is made of sheet metal. Mounted on the two limbs (9, 10) of the support (8) protruding out of the machine housing (2) are a printing device (37) and an inking device (18) which can be moved with the carriage (45). The support (8) made of sheet metal allows a very cost-effective and yet sturdy production of the pad printing machine. <IMAGE>
