Abstract (en)
[origin: WO9405386A1] A three-dimensional playing device has a cubic frame having nine windows per face of the cube arranged in three rows and three columns and 26 ($3 \times 9 - 1 = 26$) dice arranged inside the cubic frame, movable in three dimensions and whose faces bear markings, in particular colours. The following dice are provided: six dice of which three sides sharing a common corner have a first and a second colour; two dice of which three sides sharing a common corner have the first colour, their remaining sides having one the second colour and twice a third colour; two dice of which three sides sharing a common corner have the second colour, the remaining sides having once the first colour and twice the third colour; four dice of which three sides sharing a common corner have the third colour, the remaining sides having twice the first colour and once the second colour; four dice of which three sides sharing a common corner have the third colour, the remaining sides having once the first colour and twice the second colour; the remaining eight dice have all three colours, two sides of each colour.
