Abstract (en)
[origin: EP0542282A1] The damping system of a vehicle is generally fixed for its entire life in accordance with the structural configurations. It is proposed, for relatively expensive vehicles, in particular high-performance vehicles, to provide valves (4, 5, 6, 17) which can be set from outside and by means of which the damping characteristic of the vibration damper can be set as desired. <IMAGE>

Abstract (fr)
Habituellement, le système d'amortissement d'un véhicule automobile est déterminé pour toute la durée de vie conformément aux conceptions constructives. L'invention propose, pour des véhicules haut de gamme, notamment pour les voitures sportives, de prévoir des soupapes réglables de l'extérieur (4, 5, 6, 17) permettant de régler librement la caractéristique d'amortissement de l'amortisseur de vibrations.
