Abstract (en)

Disclosed is a solid photographic processing composition for silver halide photographic light-sensitive material comprising a support and provided thereon, a silver halide emulsion layer, wherein the composition is in the form of tablets prepared by compressing a powder or granules comprising at least one photographic processing agent component, and each mechanical strength Z of said tablets is within the range: $0.3 < Z \leq 3.5$ wherein Z is the ratio of the crushing strength (Kg) of the tablet to the major axis length (mm) of the tablet.
