Abstract (en)

[origin: WO9310024A1] A device is disclosed for transporting and/or storing general cargo items, as well as an associated loading and unloading device for a transport and/or storage device and a corresponding process for loading and unloading the device. In order to obtain a device for transporting and storing general cargo items, and a corresponding process for loading and unloading general cargo items into and from such a device, allowing general cargo items to be loaded and unloaded quickly, easily and in a reduced space, the device has a foldable web of film or fabric material that is folded in order to form at least one essentially U-shaped pocket (1) in which the general cargo items can be placed. Suspension means located at the upper end of the pockets can be suspended from at least one suspension device secured to a base frame (6).
