Abstract (en)

[origin: WO9310617A1] A method and apparatus (2) for performing transfers of computer file data stored on a computer-accessible medium, such as a diskette (11, 13), using the same communication line (4) shared by a facsimile (fax) machine (12, 14). The method and apparatus (2) employ adaptive switching techniques to provide for the receipt of data from either a fax machine (12, 14), a personal computer configured with a modem (28), or another device of the present invention (177), and provides for the file transfer crash recovery.
