Abstract (en)

[origin: EP0612540A1] Device of the type comprising a complex of fibrous and/or textile elements assembled by adhesive bonding. According to the invention, the various elements (4, 5) are assembled using an active refractory adhesive (6), which holds up to approximately 1300°C, and includes components and active additives containing chemically bound water which are stable at temperatures less than 80°C. Application to protecting cable ducts. <IMAGE>
