Abstract (en)
[origin: EP0612894A2] Panel intended for the building industry, made up of an assembly of plates (10a, 10b, 10c) made of a construction material. According to the invention, the said panel includes two support elements (20a, 20b) extending parallel over the entire length of the panel, the said plates (10a, 10b, 10c) of a construction material being plates of extruded polystyrene assembled adjoining one another on the said support elements and extending as a single piece over the entire height of the panel. Application to the building industry, particularly for producing partitions or walls for revamping old premises. <IMAGE>
