Abstract (en)

[origin: EP0612902A2] The present application relates to an interior actuation mechanism for vehicle doors, with an actuating lever (4) mounted pivotably in a bearing part (2) via a pivot mounting (8) and operatively connectable to a door lock for opening the door, whilst the bearing part (2) is to be fastened especially unreleasably to a door interior trim. The actuating lever (4) is releaseably connected or connectable to the bearing part (2) via catch means (22) resiliently movable in the axial direction of the pivot mounting (8) and forming integral parts of the pivot mounting (8). <IMAGE>
