Abstract (en)
A photographic assembly which comprises an opaque photographic base on which is coated at least one photographic emulsion layer, there being coated on the topmost emulsion layer a gelatin supercoat layer which comprises from 5 to 35% by weight of colourless polymer particles which have a glass transition temperature (Tg) of at least 40 DEG C and have a particle size of not more than 90nm and have substantially the same refractive index as gelatin. The object of the coating is to produce a high gloss and reduce the haze.
