Abstract (en)

[origin: WO9007288A1] The article includes a container (1) containing at least one and preferably several precious stones (11). The envelope of the container includes a housing (3) and a safety card or plate (5) integral with the housing so that the precious stone or stones (11) contained in the container (1) cannot be removed from the latter and that the safety card or plate (5) cannot be separated from the remaining container (1) without damaging the latter in a noticeable manner. The safety card or plate (5) includes visible safety characters and an electronic chip that make it virtually impossible to falsify the safety card or plate (5). Said article is therefore suitable for use as a negotiable financial item.
