Abstract (en)

A thermal transfer image receptor sheet comprising a substrate and an image receptor layer composed mainly of a polycaprolactone whose main chain has the structure of the formula (1) and formed on the substrate. -(CH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>CH<sub>2</sub>COO)- (1> The above thermal transfer image receptor sheet shows excellent image receiving performance, and gives an image receptor product which is excellent in adhesion of the image receptor sheet to an image-forming ink composition, scratch resistance and weatherability, and which is free from contamination caused on the surface by dust, soot, etc. <IMAGE>
