Abstract (en)

[origin: WO9310946A1] The tandem blades (50, 51) of a razor can be protected when not in use for shaving, without disturbing a pre-set shaving geometry and with reduced risk of damage to the blades (50, 51) and the fingers of a user during manipulation, by providing a shaving cartridge (11) which is movable, relative to a handle (10) of the razor, for retraction behind a shield (23) formed in the handle. Also disclosed are means to provide, in such a razor, replaceable cartridges (11) for a permanent handle (10) which includes a cartridge carrier (61).
