Abstract (en)

A silver halide photographic light-sensitive material is disclosed. The light-sensitive material comprises a support having thereon a silver halide emulsion and optionally a hydrophilic colloid layer other than the emulsion layer. At least one of these layers contains a latex of polymer comprising a repeating unit derived from a monomer having a solubility in water of not higher than 0.025 % by weight at 25 DEG C and the content of said repeating unit in said polymer is not less than 50 % by weight.
