Abstract (en)
[origin: GB2262699A] A species-selective field trap for flies which comprises a receptacle (1) having a removable lid (4), said receptacle forming a substantially closed chamber(s), when the lid is in place, within which a source of chemical attractant vapour attractive to the selected species of fly and unattractive to most other species of fly is positioned in use, the receptacle having a substantially opaque upper, in use, end (2, 4) which is coloured as a visual attractant to the selected species of fly and having one or more small apertures (6) in a/the side or the lid, in use, thereof adapted to closely accommodate passage of the selected species of fly therethrough, said apertures being the primary and preferably the only means by which the chemical attractant vapour is emitted from the receptacle.
