Abstract (en)

The present invention relates to a section member assembly, particularly designed for making book and sliding main doors, which comprises upright section members (1,2) and cross section members (3,4) for making fixed frames and wing frames. The main feature of the invention is that the section member assembly further comprises hinge elements (16), including a block member (10) which can be engaged in a seat of the upright (1,2) and can be locked in its engaged position, by means of a threaded dowel (12) engaging in a threaded hole (11) of the block member (10) and bottoming on the bottom portion of the seat. The block members comprise a pair of threaded seats (20), for engaging therein bolts (18), passing through the legs (15) of the hinge elements (16), extending from the cylindric body (17) housing the pivot pin. <IMAGE>
