Abstract (en)

[origin: EP0616790A2] The invention relates to an articulated connection (4) for a household appliance, such as especially a vacuum cleaner, a steam cleaning apparatus or the like, the articulated connection (4) being designed as a swivel joint and, if desired additionally as a tilting joint, between an appliance shaft (2), which is designed preferably in the manner of a tube for the passage of a fluid or suction or compressed air, and a working attachment (5). In order to further develop the known articulated connection, especially with regard to improving the manipulability, two swivel joints (10, 12) are provided, between the working attachment (5) and a connection piece (11) and also between the connection piece (11) and the appliance shaft (2). <IMAGE>
