Abstract (en)
[origin: US5431108A] A car for transporting a track switch comprises a beam-shaped frame, undercarriages supporting the beam-shaped frame on track rails, the undercarriages having axles extending perpendicularly to the longitudinal direction and the beam-shaped frame being centered with respect to the axles. At least two track switch loading platforms are mounted on the beam-shaped frame for pivoting about an axis extending in the longitudinal direction, the loading platforms being spaced from each other in the longitudinal direction. At least two drives link each loading platform to the beam-shaped frame for pivoting the loading platform, and fastening elements are provided for detachably connecting a track switch to the loading platforms for transporting the track switch.
