Abstract (en)

[origin: EP0617235A2] The present invention relates to a device for locking the door of a cooker. This device comprises, mounted on the chassis, a hooking device comprising a pivoting hook (7) actuated by the displacement of a slide (9) controlled by an actuator (14) which is brought into play at the time of locking and unlocking, the hook coming at the time of locking to engage a catch (4) mounted on the door. Application, in particular, to cookers with cleaning by pyrolysis. <IMAGE>
