Abstract (en)

[origin: EP0617246A2] The invention relates to a control and regulating apparatus in particular for boilers, consisting of a pivotably mounted housing (1) with adjusting and display elements arranged in its visible-side front face (4). In order to be able to install such an apparatus directly on a boiler without lateral pivoting base, for the purpose of direct cable introduction, but nevertheless at the same time to ensure an adjustment of the front face which is favourable in terms of viewing, according to the invention the housing (1) of such an apparatus is formed from a housing lower part (2) and from a second housing part (3) which is in the form of a sector of a circle cross-section, comprises the front face (4) and can be pivoted into and out of said housing lower part, limited by stops, in the manner of a barrel of a telescope. <IMAGE>
