Abstract (en)

[origin: US5125390A] A cooking apparatus, a burner construction therefor and methods of making the same are provided, the cooking apparatus comprising a frame unit having a top surface unit provided with an opening passing therethrough, and a burner construction carried by the frame unit so that the burner construction projects out of the opening above the top surface unit, the burner construction comprising a first portion that extends above the top surface unit, the first portion having a chamber therein and having ports out of which fuel can issue from the chamber to burn externally to the first portion above the top surface unit, the burner construction comprising a second portion that extends below the top surface unit and has structure for interconnecting with a fuel source conduit and for delivering fuel therefrom to the chamber, the first portion and the second portion being separate parts respectively having first structure interconnecting the same together in one of a plurality of selectable rotational positions therebetween, the second portion and the frame unit respectively having second structure interconnecting the same together in one of a plurality of selectable rotational positions therebetween.
