Abstract (en)

[origin: EP0618045A1] This wrench comprises a strap (2), particularly a metal one, the two ends of which are fixed to a threaded rod (3), a supporting body (1), and a tapped handle (4) into which is screwed the threaded rod which is mounted so that it can rotate on the supporting body. The supporting body (1) is constituted by a single-piece component equipped with a central passage (11) through which the threaded rod passes and the bearing face (5) of which is cylindrical and of axis perpendicular to the axis of the handle. Application to wrenches for taking oil or petrol filters off motor vehicles. <IMAGE>
