Abstract (en)

[origin: EP0618321A1] Machine for automatically sewing two stockings together to form a pair of tights (pantihose) comprising several twinned flat forms (1) for supporting each pair of stockings to be joined, means for positioning and moving the stockings over the respective forms, with means for longitudinally cutting the said bodies, in which machine the said forms (1) are supported individually by corresponding form-bearing pallets (2) so as to allow them to be driven separately and at different speeds, in which machine an automatic sewing machine (3) is provided, stationary, in register with the station (S) for sewing the stockings, so as to make the single seam, that is to say without discontinuity, of the aligned edges of the bodies thus cut, and in which machine means are provided for driving each pallet (2) in register with the sewing station (S) at a differentiated speed with respect to all the others. <IMAGE>
