Abstract (en)

[origin: WO9313113A1] The invention concerns a method of reducing the colour of surface-active compounds by carrying out a bleaching reaction with peroxy compounds in the presence of bleach boosters selected from the group consisting of alkaline-earth ions, zinc ions and/or alkali-metal silicates.

Abstract (fr)

La couleur de composés tensioactifs peut être améliorée par blanchiment au moyen de composés peroxygénés en présence d'accélérateurs de blanchiment choisis dans le groupe formé d'ions alcalino-terreux, d'ions zinc et/ou de silicates alcalins.
