Abstract (en)

[origin: FR2697040A1] A soundproofing member for forming a sound barrier. Each member includes a substantially plane panel (1) of predetermined height and an angled portion (2) consisting of a substantially plane strip. The angled portion magnetized to one end of the panel (1) and the plane of the angled portion are at an angle alpha of 7-35 DEG relative to the plane of the panel. The member may be used to control noise from high-speed rail vehicles or road traffic.
