Abstract (en)
[origin: WO9312308A1] A panel structure comprises building panels (10) arranged in an edge-to-edge abutting relationship, each comprising a panel (12) of polymer concrete having a repeating relief pattern (18) in the exposed face thereof. The relief pattern imitates the appearance of brickwork and repeats itself substantially without interruption across the joints between the panels. Each panel (10) further comprises a supporting framework (14) of timber affixed to the rear face of the polymer concrete panel, and a heat insulating material (16) in voids formed by the framework.

Abstract (fr)
Structure de panneaux comportant des panneaux de construction (10) contigus au niveau de leurs bords. Chaque panneau comporte un panneau (12) en béton de résine synthétique dont la façade présente un relief répété (18). Ce relief imite l'aspect d'un mur en briques et se répète sensiblement sans interruption au niveau du point de contact entre les panneaux contigus. Chaque panneau (10) comporte également une ossature porteuse en bois (14) fixée à la face arrière du panneau en béton de résine synthétique, et un matériau d'isolation thermique (16) placé dans des volumes vides ménagés dans l'ossature.
