Abstract (en)

[origin: EP0619090A1] The invention relates to an arrangement for the angularly rigid support of a vertical partition wall (2) on a room wall (1). For this purpose, provision is made for a corner connector bar (9) which is fixed between a first connecting point (7) on the top edge (2a) of the partition wall (2) and a second connecting point (8) on the room wall. The effective length of the corner connector bar 9 can be adjusted for fine adjustment of the angular position of the partition wall (2). <IMAGE>
