Abstract (en)
[origin: EP0619583A2] An electrical round cable having a ribbon cable (15) which is twisted to produce a round shape and has a soft supporting strip (13), and a plurality of cable elements (15) which run parallel to one another, but separated from one another, and are fixed to the supporting strip (13) only over a relatively small region of their outer circumference. The ribbon cable (11) can also be used as such for applications in which the capability to fold and deform the soft supporting strip (13) easily is advantageous. <IMAGE>
