Abstract (en)
[origin: WO9309718A1] The interior surface of a container (10), such as a bloodbag, is primed and subsequently coated with a time-releasable viricide (11) against HIV absorbed in a hydrogel polymer (14). The viricides of this invention are derivatives of urea, and upon release into the blood, have not adverse effects on the red blood cell functions of the blood.

Abstract (fr)
On applique une couche de fond sur la surface interne d'un récipient (10), tel qu'une poche pour sang, et on l'enduit ensuite d'un viricide à libération entretenue dans le temps (11) contre le VIH, absorbé dans un polymère d'hydrogel (14). Les viricides utilisés sont des dérivés d'urée, et ne présentent pas d'effets délétères sur les fonctions des érythrocytes sanguins.
