Abstract (en)

[origin: WO9313946A1] A device for feeding a continuous rolled strip of printing substrate to a laser printer (10) not otherwise configured therefor, and dispensing the strip (5) in a predetermined format. The device comprises an infeed unit (12) and an outfeed unit (14) respectively arranged at the input (22) and output (24) of the printer, and each including a guillotine unit (32, 34) for cutting the strip as well as a unit for measuring the length of the strip between one cutting operation and the next. The device is particularly suitable for quickly producing business cards and other small-format documents.
