Abstract (en)
[origin: WO9313970A1] The construction of a railway vehicle providing improved passenger comfort, especially during acceleration and braking, is facilitated by a chassis member (1) for at least an individual wheel (6) in which the chassis member (1) is secured at one end to the body (3) of the railway vehicle via a longitudinal stabiliser (2) to be vertically movable and horizontally fixed and is supported at both ends to the vehicle body (3) via compression springs (4, 5).
