Abstract (en)

[origin: EP0620029A2] The support bearing (A) and sole holder (B) can alter their reciprocal position along the ski (Sk) lengthwise axis. The support bearing has a support element (St) cooperating with a tension element (3). The sole holder has a holder element (6) which is secured on the ski top surface and tilting on a transverse axis, gripping the ski-boot toe. The tread plate upper side has at least one protuberance (5).
