Abstract (en)

[origin: EP0620166A1] A packaging for cigarettes and cigars or similar smoking products (6) consists of a box (1) with a hinged lid (4) and an inner wrapper (7), inserted into the box and enclosing a number of cigarettes, cigars or similar smoking products, the upper part (9) of the inner wrapper being able to be pulled off from the lower part (10) thereof. According to the invention, the lower region of the inner space of the box (1), remote from the hinged lid (4), is narrower in cross-section than the region of the box inner space located above it, in a manner such that surface pressure is exerted in this lower region between the smoking products (6) and the inner wrapper (7). Moreover, the upper part (9) of the inner wrapper, which can be pulled off, extends approximately to the upper edge of the cross-sectional constriction (5). <IMAGE>
