Abstract (en)
[origin: EP0620296A1] A plastic strip (50) on the flexible bow (34) forms a sliding guide for the bars (29) of the flat in their working position. The plastic element is fastened to the bow (34) outside the working range of the bars of the flat. The guide of the bars of the flat at the entry point is designed in such a way that no load peaks are generated in the plastic element. <IMAGE>
