Abstract (en)
[origin: EP0620304A1] In the method, the article is prepared on a carriage, the distance a between the warp stop motion and the last heald frame being set, and is put into store. Insertion of the article into a weaving machine takes place with the set distance a being maintained. The device comprises a carriage (1) with an apparatus (21) for setting the distance a appropriate for weaving and appropriate to the article and an auxiliary subassembly with a receiving apparatus (27) for the warp stop motion (12) and with a receiving apparatus (40) for the heald frames (13), in order to insert the article into a weaving machine at the distance appropriate for weaving and appropriate to the article. <IMAGE>
