Abstract (en)

[origin: EP0620320A1] The feed device (7) for a machine for spreading a road surfacing material, of the finishing machine (1) type or the like, is intended to be positioned at the front of the finisher (1). It includes a hopper (10) provided with a central opening (23) for withdrawal of the surfacing material by the finisher (1), and means (21) for lateral prespreading of the said material, the final spreading being carried out by the finisher (1) over the entire width thereof. The invention finds its application on public works sites. <IMAGE>
