Abstract (en)

[origin: EP0620350A1] According to an exemplary embodiment of the invention there are provided, in the region of a corner deflection 10 of the drive-rod system 16 of a sash/leaf frame, two engagement elements 26, 38 of which a first engagement element 26 serves to fix a tilted-slightly-open position of the sash/leaf frame and a second engagement element (38) serves to lock the sash/leaf frame. The two engagement elements 26, 38 engage respectively into first engagement means 32, 36 and second engagement means 44 of a fitting part 24 on the window/door frame. In this arrangement, the engagement means 44 is fitted on the fitting part 24 on the window/door frame such that it can be adjusted transversely with respect to the plane of the window/door frame. <IMAGE>
