Abstract (en)

[origin: DE4243640A1] The invention concerns a device intended for use with an air-blowing appliance for personal use, in particular a hair-dryer or a hot-air curler. The device has a main body (10) and a flat air-output element (12) with several air-outlet apertures and with several hair-styling elements (16) disposed in close vicinity to each other. The remote ends (18) of the hair-styling elements (16) form an essentially concave envelope.
