Abstract (en)

[origin: EP0621189A2] The canister has a wall part (6) between a foot part (2) and a top part (4). Arranged in a front or rear half of the canister are a central fold line (12) and, on each side thereof, a lower fold line (14) and an upper fold line (16), which fold lines extend in each case over half the narrow side up to the main centre-plane (18) of the canister and are in each case of crease-like design, thus facilitating the folding of the canister.
