Abstract (en)  
[origin: CH684297GA3] The watch case includes a band (1), a removable bezel (4) and bayonet means of engagement (8, 9, 10; 11, 12, 13) of the bezel on the band. Locking means (6) are interposed between the bezel and the band when a predetermined angle of rotation has been traversed by the bezel, this so as to prevent any rotational movement of the bezel. These locking means include manual grasping means (7) enabling the said locking means to be retracted and then the bezel to be disengaged from the band initially by rotation followed by translation. <IMAGE>

Abstract (fr)  
La boîte de montre comporte une carrure (1), une lunette amovible (4) et des moyens d'engagement à baïonnettes (8,9,10;11,12,13) de la lunette sur la carrure. Des moyens de blocage (6) s'interposent entre la lunette et la carrure quand un angle de rotation prédéterminé a été parcouru par la lunette, ceci pour empêcher tout mouvement de rotation de la lunette. Ces moyens de blocage comportent des moyens de préhension manuels (7) permettant d'escamoter lesdits moyens de blocage, puis de dégager la lunette de la carrure par rotation d'abord et translation ensuite. <IMAGE>
