Abstract (en)  
[origin: WO9313829A1] Proposed is a foam-spraying device (10) in which the air/liquid mixture to be foamed is passed, before it reaches a sieve (52), through an element containing perforations in order to ensure homogeneous distribution of the air trapped in the foam produced.

Abstract (fr)  
Dans un vaporiseur de mousse (10), le mélange d'air et de liquide à mousser s'écoule à travers un élément pourvu d'ouvertures avant d'atteindre un filtre (52), ce qui permet d'homogénéiser l'air inclus dans la mousse produite.
