Abstract (en)  
[origin: WO9313859A1] A shredded waste collector, in particular for shredded bank notes, has an upwardly open bag (3) for the shredded waste that can be laid in a collecting container (2) of a shredding device. In order to make it easier to handle the bag in such a device and to avoid dirt deposits in the area of the shredding device and along the transport path of the shredded waste, the bag (3) is disposable and has a holder (4) arranged at its opening that can be secured to a receptacle arranged in the area of the outlet of the shredding device. Both the holder (4) and the receptacle have matching through-openings for the shredded goods.
